

Angular 2 UI components - which library? [closed]

I am trying to find some useful UI components that work with angular 2. I am really new to Angular 2 (and never worked with angular 1 anyway). I was told that Prime NG is probably a very good one and it looks like it is. But I was wondering if anyone else has been able to find a better library for UI components that work good with Angular 2. Kendo seems is not there yet it seems. Bootstrap 4 is still in Alpha and I am trying to choose something that is stable at the moment but I think bootstrap 4 is great.

From:

- Angular Material 2
- Fuel-UI
- Kendo UI
- ng-bootstrapng-lightning
- ng2-bootstrap
- Onsen UI
- Prime Faces
- Semantic UI
- Vaadin

Which stable library is best choice (support, speed, configuration, feature-rich, etc) if every one of it contains components I need?

Many good questions generate some degree of opinion based on expert experience, but answers to this question will tend to be almost entirely based on opinions, rather than facts, references, or specific expertise.

If this question can be reworded to fit the rules in the [help center](#), please [edit the question](#).

6 Which one did you finally go with? – [Srikanth](#) Nov 21 '16 at 4:55

I am in a similar situation with a new ng2 project. Which one did you choose? The Prime Faces one looks good but the commercial license is prohibitive. – [DotnetDude](#) Nov 21 '16 at 21:47

I suggest you also look at Ignite UI JS Blocks. It's open source: github.com/IgniteUI/igniteui-js-blocks – [Konstantin Dinev](#) Jun 9 at 12:41

11 Angular Component Libraries You Should Know In 2018

My number one on the list is bootstrap, I use it for past year and I really enjoy it.

- **ngx-bootstrap** Native Angular2 directives for Bootstrap. **Not every component** from [Valore Software](#) is part of this framework, there are few more I use separately from theirs github page.
- **Teradata Covalent UI Platform** UI platform built on Angular 2 + Material Design
- **Angular Material 2** Material Design components for Angular 2
- **Fuel-UI** Fuel-UI is a collection of native Angular 2 components, directives, and pipes for Bootstrap 4.
- **Kendo UI** One of the first major UI frameworks to support Angular 2
- **ng-bootstrap** The Angular 2 version of the Angular UI Bootstrap library. This library is being built from scratch in Typescript using the Bootstrap 4 CSS framework.
- **ng-lightning** Native Angular 2 components & directives for Lightning Design System
- **Onsen UI** UI components for hybrid mobile apps with bindings for both Angular 1 & 2.
- **Prime Faces** PrimeNG is a collection of rich UI components for Angular 2
- **Semantic UI** UI components for Angular using Semantic UI

- **Vaadin** Material design inspired UI components for building great web apps. For mobile and desktop.
- **Wijmo** High-performance UI controls with the most complete Angular 2 support available. Wijmo's controls are all written in TypeScript and have zero dependencies. FlexGrid control includes full declarative markup, including cell templates.
- **MDC** Material Components for the Web Create beautiful apps with modular and customizable UI components.

Angular Google Maps:

- **ng2-ui**
- **AGM** currently in beta

Dashboards:

- **ng2-admin**
- **ngx-admin**

Others:

- **UIKit**

Worth mentioning:

- **Material Design Lite**

Thanks to users:

- **Clarity Design System** / Mubasher

really nice info with the link.Thank you :) – [Sampath](#) Dec 30 '16 at 16:06

Now there is one more on the way, Project clarity. vmware.github.io/clarity/documentation/toggle-switches
What do you think about this? – [Mubasher](#) Feb 24 at 6:29

Something like material design lite – [Adam Michalski](#) Feb 27 at 5:23

- 4 **PrimeFaces - PrimeNG is the most mature UI framework.** 1. It consists of almost all the components you would want to have from a UI framework. 2. Good documentation. 3. Theming options and Grid system. 4. It gets updated frequently (just 6 days after Angular 4 release, PrimeNG4.0.0-RC2 released). – [Brampage](#) Apr 4 at 9:51

Most of UI components' frameworks are in progress. (Angular2 support)

- 1) [angular2-material](#)
- 2) [ng2-material](#)
- 3) [ng2-bootstrap](#)
- 4) [PrimeNG](#)

and so on...

Why this libraries, Wchich of this libraries is best (fastest/smallest/feature-rich or something) if every one has components I need. – [Adam Michalski](#) Nov 9 '16 at 8:41

ng2-material now found here : github.com/justindujardin/ng2-material – [Tony](#) Feb 8 at 7:49

1 Teradata open source Angular Material 2 base UI library

2 KendoUI - commercial lic but components are based on angular

3 PrimeNG - Open source 70+ UI components based on angular4

4 Google own angular material 2 components - limited components & slow improvement.

5 Amexio -Angular 4 UI components powered by (Twitter)
